

José Ignacio Navarrete Dzul

Sr. Full Stack Developer · Angular Specialist · AI-Assisted Development

Angular · TypeScript · Laravel · Next.js · NestJS · PostgreSQL · LLMs

ignacio_navarrete_dzul@outlook.com · [GitHub](#) · [Portfolio](#) · Mérida, Yucatán, Mexico · 10+ years of experience

ABOUT ME

I have spent more than 10 years building web software, mostly as an Angular specialist and more and more on the backend. Those years taught me something worth more than any framework: understand the problem before writing code, spot early where a system can break, and decide what is worth building and what is not.

In 2026 I took three products of my own from idea to production, with real customers who use them every day. I use AI as one more tool to move faster, but design decisions, reviews and responsibility for what ships are still mine.

I have worked in remote, international teams, modernizing legacy systems, cleaning up architectures and mentoring less experienced developers.

EXPERIENCE

Independent Full Stack Developer — Own projects

PrintFlow · Godinoterapia · VectorSensei | January 2026 – Present | Mérida, Mexico

- I built **PrintFlow**, a system several print shops now use every day to run orders, production, pricing, payments and shipping, with a portal where their customers track their orders.
- I launched **VectorSensei**, an online store for print-ready designs with payments, memberships and protected downloads.
- I test every change locally and in controlled environments with test data first, so what reaches production works well from day one.
- I work with LLMs and coding agents as part of the team, with rules and context I prepare for each project.

Sr. Frontend Developer — Procetti

August 2024 – January 2026 | Remote, Mexico

- Led the reorganization of the project architecture so it was faster and easier to maintain.
- Migrated the application from Angular 17 to 18 and then 19, with security improvements and lighter bundles.
- Improved real-time data handling with Signals, NgRx and RxJS.
- Cleaned up navigation and server calls with lazy loading, guards, resolvers and interceptors.

Sr. Frontend Developer — Neoris

April 2022 – March 2024 | Mexico · Clients: Telcel (SIGADE), Cemex

- Built interfaces for enterprise systems with Angular Material and Tailwind CSS.
- Implemented state management with NgRx and RxJS in large applications, keeping performance in check.

Earlier experience

2016 – 2022

- **Nova Solutions Systems** — Sr. Frontend: Bursanet migration from AngularJS to Angular.
- **Relappro** — Full Stack: web applications with Angular and Node.js.
- **Simetrical** — Backend: APIs with Symfony. · **Efisense Interactive** — Web: PHP, CodeIgniter and MySQL.

RESPONSIBLE USE OF AI

I work every day with LLMs and coding agents (Claude Code, Codex, Kimi and others). They help me move faster, and my years of experience help me notice when they get things wrong. To use them well I follow a few rules:

- I review and understand every change before accepting it. If I cannot explain it, it does not ship.
- I do not share my clients' code, data or credentials with outside services without their permission.
- Nothing reaches production without tests. I am responsible for what I ship, not the tool.

SKILLS

Frontend: Angular (specialty), Signals, NgRx, RxJS, Next.js, React, TypeScript, Tailwind CSS, Angular Material.

Data: PostgreSQL, MySQL, Redis, MongoDB, Drizzle ORM, Eloquent.

Cloud & DevOps: Docker, GitHub Actions, Vercel, Railway, Google Cloud, Git Flow, Conventional Commits.

Backend & APIs: Laravel/PHP, Livewire, Filament, Node.js/NestJS, REST, webhooks, multi-tenancy.

Payments & services: Stripe (payments and Billing), MercadoPago, Conekta, Cloudflare R2, Resend, Twilio, Google APIs.

Quality: PHPUnit, Vitest, Jasmine, PHPStan, ESLint, Prettier, code review.

FEATURED PROJECTS

PrintFlow — System for print shops

Orders, production, pricing, payments and shipping in one place, with a free trial and subscription. It also has a connected [online store](#) where customers upload their design and place their order.

Godinoterapia — Custom t-shirt store

Catalog, online quotes and deposit-based orders.

VectorSensei — Digital design store

Payments, memberships, protected downloads and Google sign-in.

SIGADE System — Telcel

Warranty management with Angular and NgRx, with different user roles.

EDUCATION AND CERTIFICATIONS

Universidad Tecnológica Metropolitana — Associate degree (TSU) in Multimedia and E-commerce (2011–2013), license 09179779 · Associate degree (TSU) in Graphic Arts (2008–2010), license 6997154.

Docker: From Beginner to Expert · ReactiveX – RxJS · Advanced Angular · NgRx in Angular · OpenAI: assistants with Angular + NestJS.
